

光纤跳线

Fiber optic patch cord

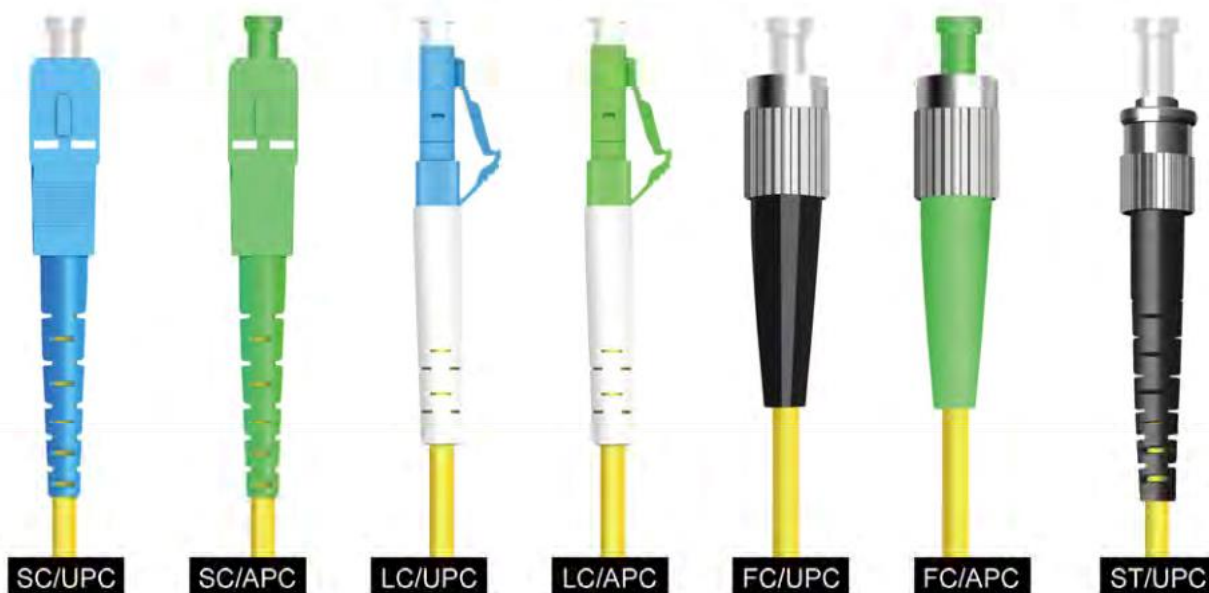

一、概述Description:

光纤跳线用来做从光纤布线链路到设备的跳接线。有较厚的保护层，一般用在光网终端盒与终端设备之间的连接，在光纤通信系统、光纤接入网、光纤数据传输以及局域网等一些领域有广泛的应用。

Optical patch cord are used to make connection from optical fiber network to equipment. It has a thick protective layer, generally used for the connection between optical network terminal boxes and terminal equipment, it has a wide range of applications in some fields such as optical fiber communication systems, optical fiber access networks, optical fiber data transmission, and local area networks.

二、产品特点Features:

- 插入损耗低
- 回波损耗高
- 重复性好
- 互换性好
- 温度稳定性好
- Low insertion loss;
- High return loss;
- Good repeatability;
- Good interchange;
- Excellent environmental adaptability.

三、技术参数Specification:

接头Connector	端面End face	模式Mode	纤芯Fiber type	线径Diameter	芯数Core QTY	护套Jacket
